PROFESSIONAL SUMMARY

Mechanical Engineering PhD candidate specializing in intelligent wearable systems for human movement analysis and digital health. Experienced in building end-to-end solutions that integrate IMU-based sensing, embedded hardware, smartphone applications, machine learning, and haptic feedback for gait analysis and rehabilitation. Skilled in Python, MATLAB, Android Studio/Java, and PyTorch, with six peer-reviewed journal publications.

EDUCATION

Ph.D. in Mechanical Engineering | University of Maine, Orono, ME — Expected Dec 2027
GPA: 4.00/4.00 | Dissertation: Smart Real-Time Gait Training System

M.S. in Mechanical Engineering | Amirkabir University of Technology (Tehran Polytechnic) — Feb 2020
GPA: 3.65/4.00 | Thesis: Trajectory optimization of a robot arm in joint and Cartesian spaces

B.S. in Mechanical Engineering | University of Tehran — Jul 2017

TECHNICAL SKILLS

Programming & Data Analysis	Python, Java, C/C++, NumPy, scikit-learn, PyTorch, SPSS
Mobile & Software	MATLAB, Simulink, TwinCAT, Android Studio, Unity, Git
Wearable & Embedded Systems	IMU sensors, Arduino IDE, SparkFun modules, PCB modules
Biomechanics & Signal Processing	Gait analysis, human activity recognition, feature extraction, OpenSim
Robotics	Surgical robotics, parallel manipulators, inverse kinematics, dynamics, control systems
CAD	SolidWorks

RESEARCH & ENGINEERING EXPERIENCE

Graduate Research Assistant | Biorobotics and Biomechanics Lab, University of Maine — Sep 2023 - Present
Orono, ME

- Development of real-time wearable sensing systems and Android-based mobile applications for gait analysis, activity recognition, and home-based rehabilitation.
- Designed a smartphone-deployed gait assessment system using a foot-mounted IMU to reconstruct foot-height trajectories and classify level walking, stairs, and ramps, achieving **96% accuracy**, **<1.1 cm error**, and **112 ms latency**.
- Development a lightweight human activity recognition system using two IMUs, and classifier, achieving **99% accuracy** for normal locomotion and **93% accuracy** for atypical stair-negotiation strategies in older adults.
- Architected a home-based haptic feedback gait-training system integrating IMUs, vibrotactile motors, custom Android applications, SparkFun modules, and PCB circuitry for adults aged 65+.
- Demonstrated up to **30% improvement** in stride length and walking speed during a haptic feedback study, with minimal cognitive demand.
- Human-subject validation studies with **85+ participants** across gait analysis, and haptic feedback protocols.
- Developed real-time algorithms and data pipelines in Java, Python, and MATLAB, signal processing, sensor fusion, biomechanical modeling, and machine learning for mobile health applications.

Mechanical and Control Systems Engineer | Sina Robotics and Medical Innovators Co. Dec 2022 - Sep 2023

- Developed PLC-based control logic for a telesurgical laparoscopic robotic platform using Beckhoff TwinCAT, with Simulink validation of inverse kinematics.
- Built a Python graphical user interface on Raspberry Pi for surgeon-facing robot control, system guidance, warnings, and improved human-robot interaction during testing and demonstrations.
- Coordinated hands-on validation sessions with **6 experienced surgeons**, using training, troubleshooting, and usability feedback to refine surgeon-facing robotic system workflows.

Laboratory Research Assistant | New Technology Research Center, Amirkabir University of Technology Nov 2020 - Nov 2022

- Designed and assembled robotics and mechatronics setups for student research projects, integrating hardware, CAD, MATLAB workflows, and technical documentation.
- Mentored 6 undergraduate students across 5 research teams, guiding equipment use, troubleshooting, documentation, and project execution.

SELECTED HONORS

Flagship Fellowship Award, University of Maine Sep 2024 - Sep 2025

Graduate Student Government Award for conference proposal Mar 2025

LEADERSHIP & SERVICE

Graduate Senator, Department of Mechanical Engineering, University of Maine Sep 2025 - Present

President, Persian Graduate Student Association, University of Maine Sep 2024 - Apr 2026

PUBLICATIONS

6 peer-reviewed (5 first-author) journal articles in wearable sensing, biomechanics, rehabilitation engineering, and robotics.
